

# CONTENTS

	Preface	vii
<b>1</b>	Object-oriented transformation <i>Kenneth Baclawski, Scott A.DeLoach, Mieczyslaw M.Kokar, Jeffrey Smith</i>	1
<b>2</b>	Being served: The purposes, strengths and limitations of formal service modelling <i>Bernard Cohen</i>	15
<b>3</b>	What vs. how of visual modeling: The arrow logic of graphic notations <i>Zinovy Diskin, Boris Kadish, Frank Piessens</i>	27
<b>4</b>	Meta-modelling semantics of UML <i>Andy Evans, Robert France, Kevin Lano, Bernhard Rumpe</i>	45
<b>5</b>	Combining JSD and Cleanroom for object-oriented scenario specification <i>Marc Frappier, Richard St-Denis</i>	61
<b>6</b>	What is behind UML-RT <i>Radu Grosu, Manfred Broy, Bran Selic, Gheorghe Stefanescu</i>	75
<b>7</b>	Applying ISO RM-ODP in the specification of CORBA <sup>®</sup> interfaces and semantics to general ledger systems <i>Jack Hassall, John Eaton</i>	91
<b>8</b>	Component-based algebraic specification <i>Shusaku Iida, Kokichi Futatsugi, Razvan Diaconescu</i>	105
<b>9</b>	A meta-model semantics for structural constraints in UML <i>Stuart Kent, Stephen Gaito, Niall Ross</i>	123
<b>10</b>	On the structure of convincing specifications <i>Haim Kilov, Allan Ash</i>	141

<b>11</b>	Formalising the UML in structured temporal theories <i>Kevin Lano, Juan Bicarregui</i>	161
<b>12</b>	JML: A notation for detailed design <i>Gary T. Leavens, Albert L. Baker, Clyde Ruby</i>	175
<b>13</b>	Agents: Between order and chaos <i>James J. Odell</i>	189
<b>14</b>	UML, the future standard software architecture description language? <i>Andy Schürr, Andreas J. Winter</i>	195
<b>15</b>	Using information modeling to define business requirements <i>Mark A. Shafer</i>	209
<b>16</b>	A layered context perspective on the design of enterprises and information systems <i>Ian Simmonds, David Ing</i>	219
<b>17</b>	30 Things that go wrong in object modelling with UML 1.3 <i>Anthony J H Simons, Ian Graham</i>	237
<b>18</b>	Formalizing association semantics in terminologies <i>Harold Solbrig</i>	259
<b>19</b>	On the specification of the business and economic foundations of electronic commerce <i>Angelo E. Thalassinidis, Ira Sack</i>	271
<b>20</b>	Embedding object-oriented design in system engineering <i>Roel Wieringa</i>	287
